

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

# Contractors' Diaphragm Pumps

No. 3—4,000 gals. per hour,  
1 man.

No. 4—6,000 gals. per hour,  
2 men.

BY HAND POWER.

**A**N Edson Manufacturing Company Diaphragm Pump, with Edson Special Suction Hose, makes the most powerful hand-power pumping outfit on the market. It will lift water containing sand, gravel or sewage matter, or anything limpid enough to flow.

Send for catalogue of our Trench Pumps and Force and Lift Pumps.

# **Rope Transmission**

---

Did it ever occur to you that there might be in existence a better transmission rope than any with which you were acquainted?

## **JUPITER TRANSMISSION ROPE IS THAT ONE**

See how many essentials of a perfect transmission rope this has to its credit

- 1 A coefficient of friction more than double that of any other rope
- 2 Remarkable flexibility, therefore high efficiency
- 3 Great strength, therefore large capacity
- 4 Unequaled durability
- 5 Not affected by climatic conditions
- 6 Well adapted to both American and English systems

**The Only Transmission Rope Thoroughly Up to Date**

We Guarantee Every Splice Put in by Us  
Designs and Estimates for Complete Drives Furnished Without Cost  
Send for Bulletin No. 6 on Transmission

## PREFACE

---

The scope of this work is so concisely stated in its title that an explanatory preface is hardly necessary. Its design is not only to furnish the most reliable and latest information, but to so arrange and classify such information as to render it useful for reference to both buyer and seller.

In its preparation the utmost care has been taken to make it thorough and complete; but in a field so active and in one in which so many changes are constantly occurring, it is not to be expected that it will be free from errors, or perfect in its detail. A careful and thorough revision, with necessary changes and additions, will be made every year; the publishers will greatly appreciate any advice of errors or omissions that such may be avoided in the next edition,—any suggestion for the improvement of the work will be welcome.

We would recommend the users of this work to always consult the Index of the Classified List of Headings which has been carefully compiled and arranged for the convenience of all; it is an important feature, and a necessity in a work of this nature.

In case only the address is desired of some particular party, reference should be made to the ALPHABETICAL LIST OF NAMES; an entirely new feature in a publication of this character. In this list will be found a complete list, alphabetically arranged, of all the different names appearing under the various trade lists in Boston and Metropolitan District.

The advertisers in this work are representative, and those dealing with them can be assured that they will receive prompt and courteous attention.

A copy of this work is presented to every Architect, professionally engaged, in New England. Should any fail to receive it, he will immediately be supplied by notifying the publishers.

DISTRIBUTOR OF

## High-Grade Building Cements.

Prices quoted on best quality Portland and Rosendale Cements — any delivery.

SOLE DISTRIBUTOR for NEW ENGLAND of "EDDYSTONE" Portland Cement and "BLUE RIDGE" Hydraulic Rosendale.

Correspondence Solicited.

223 STATE ST., BOSTON, MASS.

# UNITED BUILDING MATERIAL CO.

Distributors for the

AMERICAN CEMENT CO. OF PENNSYLVANIA

**"Giant," Portland, "Union," Rosendale,  
"Improved Union"**

**STANDARD CEMENTS FOR ALL HIGH GRADE CONSTRUCTION**

Made, used in large quantities, and proved of superior merit for twenty years under eminent engineers and architects.

"GIANT," the old reliable, adapted to any work requiring a true high grade Portland cement. "UNION," made from Portland cement rock, light colored, stronger, finer ground and will carry more sand than any Rosendale cement made, especially adapted to concrete and stone masonry. "IMPROVED UNION," composed of Portland and Natural cement, and used for concrete and high grade masonry.

The above brands used practically exclusively in the Cornell Dam, N. Y., the Wauchoett Dam of the Metropolitan Water Works, Mass., the two largest masonry dams in the world, the N. Y. Rapid Transit Subway, Penn. Railroad, also by the U. S. Gov't and other important work.

Telephone, Main 4035.

## *Results Speak for Themselves*

Never mind about the claims of rival machines—  
judge by the results, the work they do. So judged,  
the No. 2—

## **Hammond Typewriter**

which has Perfect Alignment, Uniform Impression,  
Soft, Elastic Touch, Speed of over 200 words a  
minute, and is Durable and easily Portable, can  
take the lead among writing machines. The work  
it turns out is perfect in every respect—

### **100 Styles of Type in 26 Languages**

# Light and Fuel for Country Homes.

**THE MOST BRILLIANT LIGHT**  
for Evening Hours.

**THE CLEANEST, MOST CONVENIENT AND**  
**EFFICIENT FUEL** for the Kitchen and Laundry.

These can be had in any country home with all the perfection of results, economy and comfort enjoyed in the city.

## ... THE ... SPRINGFIELD GAS MACHINE

makes gas of uniform quality that is used in every way as is city gas, and that compares favorably with city gas in cost and convenience.

Among more than ten thousand using our Springfield Gas Machine, we mention the following in the vicinity of Boston:

Mr. Oliver Ames.....North Easton, Mass.  
Mr. W. H. Ames.....North Easton, Mass.  
Mr. Hobert Ames....North Easton, Mass.

"AMERICA'S GREATEST HEATER"

For  
Steam  
Heating

For  
Hot Water  
Heating

## Smith & Thayer Co.

234 AND 236 =  
= Congress Street.

Boston, Mass. U.S.A.

STEAM AND HOT WATER SUPPLIES OF ALL KINDS.

STEAM  
WATER

*Magee*  
HEATERS

MAGEE FURNACE CO.  
BOSTON, MASS.

This advertisement features a central circular frame containing five different models of steam water heaters. Surrounding this central frame are six rectangular frames, each displaying a single heater model. The heaters vary in size and design, some with multiple heating coils and others with more compact, vertical structures. The entire advertisement is enclosed in a decorative border with a repeating scroll pattern.

## ***THERE'S A GURNEY HEATER FOR EVERY BUILDING TO BE HEATED***

*One quality runs through them all:—The Very Best.*

They are on a par with your best efforts, hence will strengthen your reputation. Make it an invariable rule to use "GURNEY STEAM AND HOT WATER HEATERS" in all your work.

*They Insure Absolute Satisfaction.*

IT WILL PAY YOU TO INVESTIGATE

## The Phillips Flushing Tank

It Measures the Water, It  
Never Leaks, It has a  
Quick-closing Valve, It  
has no Floats, and is  
practically noiseless.

The Phillips Flushing Tank  
by an ingenious use of the  
weight of the water accom-  
plishes what manufacturers  
of the old-style tanks have  
tried to do by unreliable  
floats, ball-cocks, etc. It is  
a New invention, and thor-  
oughly covered by patents  
taken out by the best attor-  
neys.

The inside fittings of this  
tank can be put into any over-  
head or low down tank, and  
will be furnished to any  
Plumbing Supply House hav-  
ing call for them.

PHILLIPS FLUSHING TANK COMPANY, Boston, Mass., U. S. A.

# METAL CORNER BEADS

For Plaster Corners on Wood, Brick, Terra Cotta and Iron.

This Bead can be arched to fit any desired radius; further, it makes a true curve for the plasterer to work by, thereby saving time and labor.

Broken and chipped-off corners are unknown in buildings where this bead is used, besides adding to the architecture of build-

ing a handsome and at all times staple corner.

It is not expensive. It is cheaper to put corner bead in your building than leave it off, because it makes a true corner and a plasterer can proceed with his work and not stop to use a straightedge, which is necessary on plaster corners.

### STORE FURNISHINGS OF EVERY DESCRIPTION

Including the Famous

Troemner Agate

Scales. Canisters

and Coffee Mills

for which we are the

**Sole New England Agents.**

### Market and Grocery Store Fixtures a Specialty.

Call and see the large line of goods we carry. Or write us for catalogues and prices on goods  
you want. If you are to have a grocery, meat market, restaurant, or even a single department  
of your store newly fitted, or refurnished, let us figure on the work. Our long experience,  
competent designers and method of keeping ahead on the newest ideas in furnishings, combined  
with the fact that our goods are made of first-class materials by skilled workmen, in largest  
quantities, make it possible to insure our patrons best satisfaction at most reasonable cost.  
We are never undersold on same quality of goods.

# THE HAMMOND TYPEWRITERS

---

## **Card Cataloguing**

Card does not roll around a cylinder. It drops in place without bending.

## **Mimeographing**

The wax paper is not folded no matter how wide. Several styles of type can be used for display headings, etc.

## **Tabulating**

Work is erect and near operator's eyes, like music on a rack.

## **Catalogues**

Of 100 typeshuttles and with details of many exclusive points mailed on request.

# SIMPLICITAS DOOR OPENER

PATENTED AUGUST 4, 1903. No. 735,393

The "SIMPLICITAS" door opener is illustrated above as applied to the double sliding doors of an elevator well.

The slotted lever is pivoted to the first door, and the slotted portion rides and swings on a pivot secured to the upper portion of the frame in which the door slides; the short lever is pivoted to the slotted lever and to a pin mounted on the second door.

When an opening movement is given to the first door the slotted portion of the long lever rides upward on its pivot, and this lever swings in the direction in which the door moves; at the same time the second door is proportionately moved by the short lever connection.

As soon as the lower end of the slotted lever moves past the line of its upper pivot, the weight and leverage of the long lever acts to complete the opening of both doors.

In the closing movement the long lever acts to complete the closing of both doors, so that after the first closing impulse is given to the first door, the doors close positively and automatically without attention from the elevator operator.

There are no springs, pumps, or other complicated devices to get out of order, and the only action required is to move the first door slightly past the pivot on which the slotted portion of the long lever travels.

These door closers are giving great satisfaction wherever they have been installed, and we should be pleased to have you examine the working of the device at the stores of Messrs. Gross & Strauss and Filene & Co., Boston, Mass.

Prices quoted upon application to

PEARSON Flooring Nails used throughout

## PEARSON COATED NAILS

are offered to Architects and Builders as being a decided improvement in this detail of construction supplies

### For Flooring

their use saves almost 30 per cent in time by actual working test, and once driven they hold at least 100 per cent more than any other kind of nails. They draw down quickly and easily, and the enormous holding power prevents for all time any possibility of springing floors. The cost is less. Write us at either of our sales offices for samples and detailed information.

## SAVES 10 Per Cent IN FUEL

The ROBB-MUMFORD internally fired Boiler will save at least 10 per cent in fuel over an ordinary return tubular boiler.

It combines to a remarkable extent the best features of the Scotch Marine and English types of internally fired boilers, and the American water tube type.

It has an outer casing of sheet steel, and requires no brickwork. The casing is covered with non-conducting material.

### "MURESOCO"

THE BEST WALL FINISH

is invaluable for

Churches, Schools, Halls,  
 Houses, Basements

Beautiful, Healthful, Durable  
 Economical

WHITE AND 14 TINTS

For Color Cards, Information, etc., apply to N. E. Agents,

**GOULD & CUTLER,**

**WHOLESALE  
 PAINT DEALERS**

**BOSTON**

105-107 NORTH STREET

MAKE SURE THAT

### "MURESOCO"

is not only used on the Walls and  
 Ceilings of your house, but also

**ON YOUR CELLAR WALLS**

It is White, Sweet, Clean, fire-proof and free from Arsenic. It is really cheaper than whitewash, as it lasts longer, will not scale or rub, and generally one coat is sufficient.
